4.

a.

False

$$2x^4 \leq c(x^3 + 3x + 2)$$

$$2x \leq c + c\left(\frac{3}{x^2} + \frac{2}{x^3}\right)$$

$$2x - c\left(\frac{3}{x^2} + \frac{2}{x^3}\right) \leq c$$

as $x \rightarrow \infty$, left side $\rightarrow \infty$ but right side is constant

$2x^4$ grows faster than $x^3 + 3x + 2$

b.

True
